This Technical Data Sheet is applicable to the

605-T042-P01	Metal Detectable Lockable Knife with Lambfoot Blade
--------------	---

Industry Use

This heavy duty lockable blade lambsfoot knife comes with a blue detectable handle and has a stainless steel blade, making it ideal for general purpose use.

Features and Benefits

- Metal detectable & X-ray visible
- High carbon stainless steel lockable lambsfoot blade
- Blade has flat cutting edge and a back that curves to the point
- Handle colour: Blue
- Blade length: 55mm (2.16")
- Size: 180mm (7.08") x 27mm (1.06")

Material Specification

- Handle: Metal Detectable Plastic
- Blade: Taper Ground 420S45 Stainless Steel Hardened to 51-55 Rockwell C

General Instructions for Use

Keep the blade sharp. Keep the knife clean and dry. Keep the working parts lightly oiled using a good quality mineral oil. Always cut away from you. Use only for purpose for which it is intended.

Don't throw the knife. Don't use as a lever, pry bar, hammer, chisel or wedge.

Always work safely with tools and wear approved eye protection. Never use near live electrical circuits.

Lock Instructions

This knife features a blade which locks into the open position to minimize the risk of it accidentally closing while in use. The lock is released by carefully pushing the locking-lever away from the base of the blade before folding the blade back into the handle.

Sharpening Instructions

To maintain the edge the blade must be sharpened correctly. The blade should be sharpened on an oilstone or a sharpening steel at an angle of approximately 20° to the stone or steel and not flat. The edge should be drawn across the sharpener from heel to point, taking alternate sides, using firm steady strokes becoming lighter when finishing. For best results sharpen little and often.
